NO CONSIDERATION OF ADVERSE IMPACTS OF INVESTMENT ADVICE ON SUSTAINABILITY FACTORS

Generali Insurance Asset Management S.p.A. SGR (“GIAM”) recognizes the importance of sustainability factors in carrying out its investment advice service as stated in its Sustainability Policy, available on the GIAM website. Although, considering that the dimension of the above service represents a very limited part of GIAM’s business and it is mainly provided towards Group companies GIAM decided, pursuant to art. 4 of the Regulation (EU) no. 2019/2088, not to systematically consider adverse sustainability impacts in its investment advice, using the indicators outlined in Table 1, Annex I of Delegated Regulation (EU) 2022/1288.

Considering that GIAM is not currently planning to enlarge the investment advice service, the above approach will be maintained until a different strategic view will be adopted.
